UnternehmerTUM offers founders and start-ups a complete service, from the initial idea all the way to stock market flotation. A team of experienced entrepreneurs, scientists and managers supports founders with the development of their products, services and business models. The experts accompany them actively with building up their companies, market entry and financing – also via venture capital. The accelerator programme TechFounders coaches technology start-ups over a period of 20 weeks up to an initial venture round, and paves the way for joint ventures with established companies. For industry partners, UnternehmerTUM is a unique platform for cooperation with new companies, and for expansion of their innovative strength and culture. Covering 1500 square metres, MakerSpace, Europe’s largest publicly accessible high-tech workshop, enables companies, start-ups and creatives to produce prototypes and small batches using state-of-the-art machines such as large 3D printers.

UnternehmerTUM has a unique network of industrial companies, industry experts, talented individuals and investors. The Munich site provides technology start-ups with an ideal environment: seven DAX companies, thousands of small and medium-sized enterprises from the high-tech industry, over 15 universities, and a large number of other technology centres and business incubators.

WHAT UNTERNEHMERTUM OFFERS

For founders and start-ups:
